

I understand that the National Association of Broadcasters is attempting to stifle competition through petition 04-160 to limit content of XM radio. There is no reason for this to happen. If the NAB cannot make their own programming competitive, they should bear the brunt of their own inability. Neither the government nor the regulatory agencies should bail them out by limiting the type and content of programming available on XM radio, or any other commercial medium.

Please do not allow this to happen. I am registering my opposition to petition 04-160.

Thank you for the chance to be heard,
Bob Hohertz
